#### **Robotic Rehabilitation in Fondazione Don Gnocchi**

- 10 FDG centers connected in 8 Italian regions
- 39 robotic devices
- 3 different manufacturers
- 5 different kind of devices
- Over 3000 unique patient records
- Over 55'000 rehabilitation treatments

### The architecture for the centralization of data

### **Dashboards for Managers**

•Number of treatments and distribution along the week days

•Number of patients in charge and the new patients added;

Onlus

•Actual hours of use of the different devices and the distribution of use in percentage.

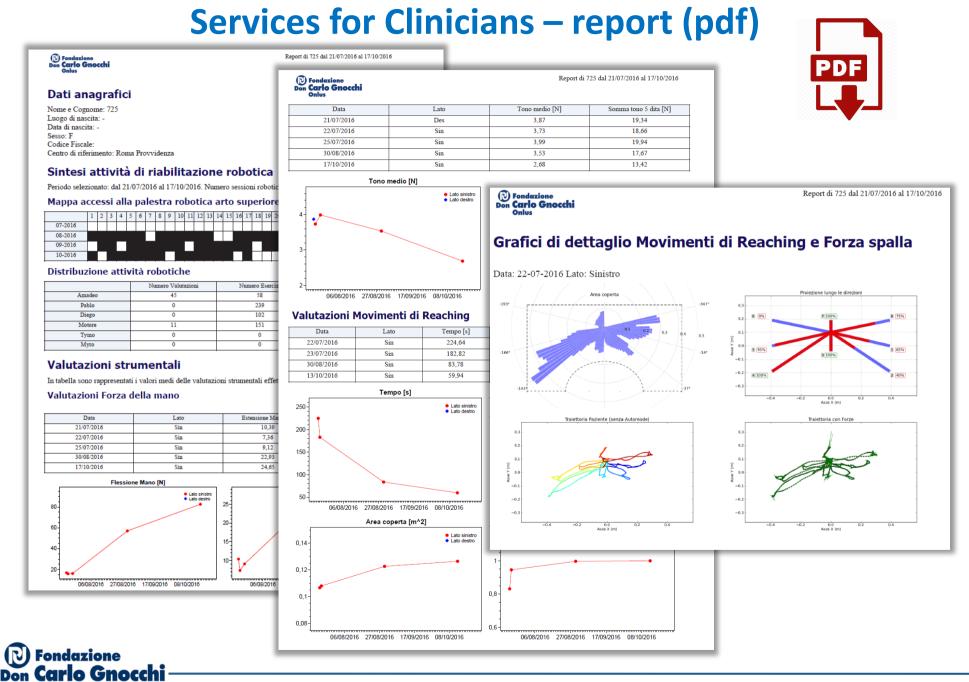

**Valerio Gower** 

# **Dashboards for Clinicians**

- Select a patient (search by name/surname);
- See the treatments pathway he/she has done;
- Analyze the patient performance over time by showing the quantitative measurements

Onlus

## **Services for Researchers**

- Access to data recorded by the devices to study for example:
  - Correlation between clinical scales and instrumental data
  - $\circ$  Predictive models of rehabilitation outcomes based on machine learning algorithms
  - $\circ$  Models for personalized and adaptive rehabilitation
