

# MISAR: Climate Change Risk Management by improving the Individual and Social Awareness of Risk in Sicily

Mohsen P. Shahvar

M. Buscemi, S. Incardona, G. Tripodo, F. Pace, and G. Marsella

Università degli Studi di Palermo

CONDI  
VISIONI

Conferenza GARR 2022  
Palermo 18-20 maggio

# Problem Statements and Aims

**Climate Change has effect on both society and the natural environment.**

**Networks are Fundamentally difficult to comprehend.**

**Innovative Multi-Sectoral approaches are required to Manage and Increase the perceptions of Individual and Social**

# Background and Case Study Area

## Multi-Risk Assessment on:

**Sea Level Rise**  
**Temperature Rise**  
**Air Quality**  
**Precipitation Events**  
**Flooding**  
**Heat Waves and Fire**  
**Damages**  
**Water Quality**  
**Changes**  
**Agricultural Damages**  
**Aquaculture Damages**

# Methodology

**Multi-Risk Assessment for the climate change factors**

**Sentiment Analysis and developing the level of learning and resilience**

**Creating an innovative tools, apps, games and connection through the network to the people**

**Changes in Shoreline, Infrastructure, Vegetation, and land use. Agricultural and Fire damages nature-based solution (NBS) will be acquired from the municipalities of Sicily.**

**By using the opinion of the people, Assess the behavioural changes regarding vulnerabilities, resilience, risk. European Social Survey, Eurobarometer, and International Social Survey Program**

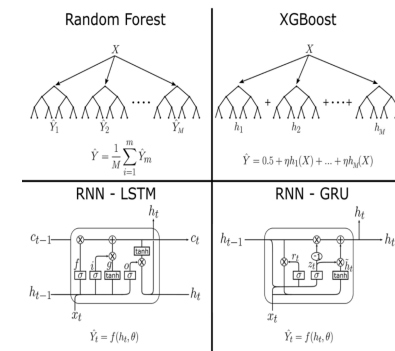

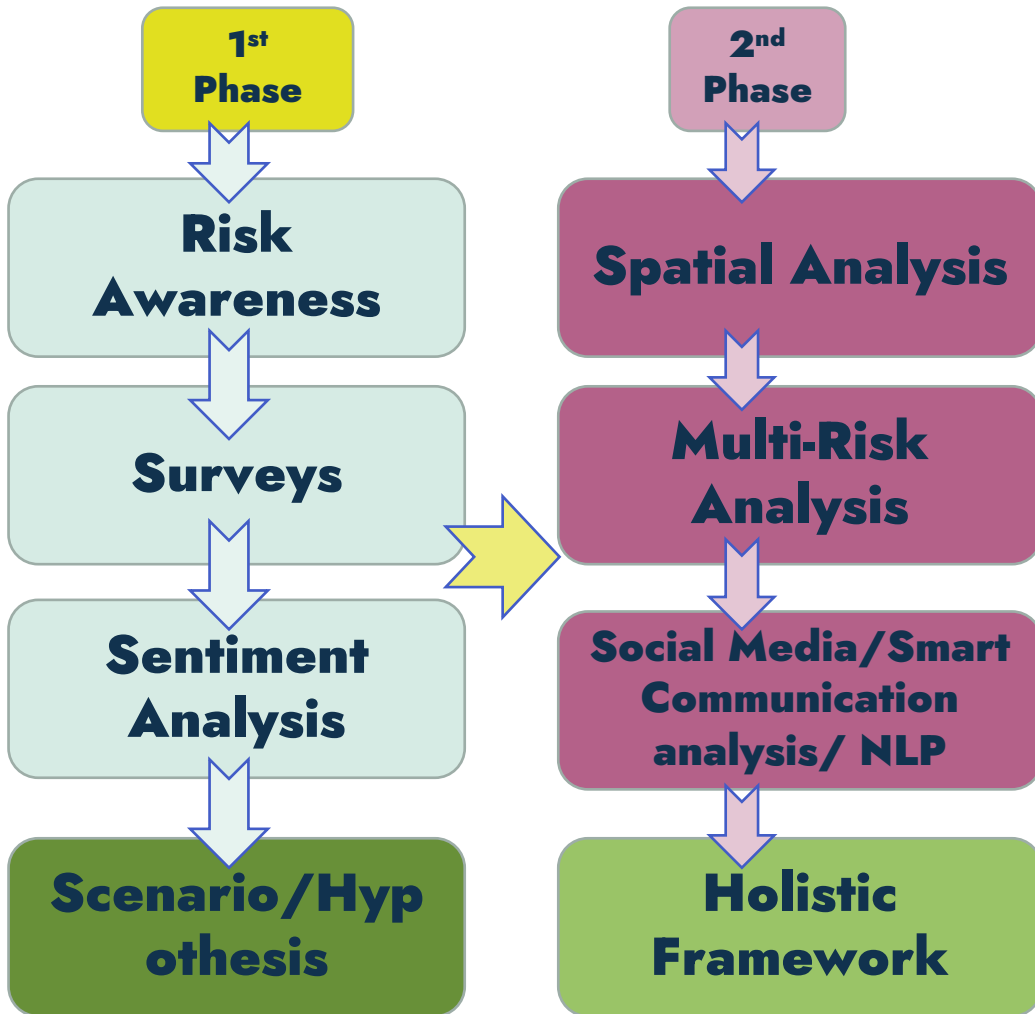

European Union

Eurobarometer

# Applications

Sources: Mohsen P. Shahvar Thesis, 2021

Mohsen P. Shahvar, CORILA Project 2021

# Application and Expected Results

Sendai Framework for Disaster Risk Reduction - 2015 (UNISDR)

# Thanks for your Attention
